

# MD ASAD UDDIN ANAS

Cybersecurity Analyst | Security Engineer

Hyderabad, Telangana, India | +91 93987 89281 | WhatsApp | mdasaduddinanas2@gmail.com

<https://md-asad-uddin-anas.netlify.app> | [github.com/MdAsadUddin-Anas-12](https://github.com/MdAsadUddin-Anas-12) | [linkedin.com/in/md-asad-uddin-anas-a6a9702b5](https://linkedin.com/in/md-asad-uddin-anas-a6a9702b5)

## PROFESSIONAL SUMMARY

Computer Science Engineering graduate specializing in Cybersecurity, with hands-on experience architecting a Zero Trust security platform featuring role-based access control, multi-factor authentication, and real-time threat monitoring. Working knowledge of cryptography, ethical hacking fundamentals, and network security, with practical exposure to blockchain-based identity and access management using Solidity and Ethereum. Completed a blockchain technology internship focused on secure, decentralized application development.

## TECHNICAL SKILLS

**Cybersecurity:** Network Security, Cryptography, Ethical Hacking Basics, Zero Trust Architecture, RBAC, IAM, MFA, Threat Monitoring

**Blockchain Security:** Solidity, Ethereum Smart Contracts, Hardhat, Ethers.js, Decentralized Identity Management

**Programming:** Core Java, Advanced Java (JDBC), Python, HTML, CSS

**Databases:** MySQL

**Developer Tools:** GitHub, Docker, VS Code, MS Office

## KEY PROJECTS

### Zero Trust Cyber Security Platform

*Personal Project*

GitHub: [github.com/MdAsadUddin-Anas-12/Zero-Trust-Cyber-Security-Platform-](https://github.com/MdAsadUddin-Anas-12/Zero-Trust-Cyber-Security-Platform-) | Live Demo: [zero-trust-cybersecurity-platform-o0g0qqq0-diigootasks.vercel.app](https://zero-trust-cybersecurity-platform-o0g0qqq0-diigootasks.vercel.app)

- Architected a Zero Trust security platform enforcing continuous verification of users and devices, eliminating implicit trust assumptions from the access model.
- Implemented multi-factor authentication (MFA) and role-based access control (RBAC) to govern identity verification and resource access policies.
- Built a real-time threat monitoring dashboard surfacing system health, security events, and access activity for continuous visibility.
- Integrated blockchain-based identity and access management (IAM) using Solidity smart contracts, Hardhat, and Ethers.js, adding a decentralized layer to authentication.
- Containerized the application with Docker and deployed it on Vercel for scalable, high-availability delivery.

### Hacking Competition Smart Contract

*Personal Project*

- Built an Ethereum smart contract to run secure hacking competitions with transparent, verifiable participant registration, reasoning through contract-level attack surface and fairness guarantees.
- Implemented an automated, tamper-resistant winner-selection mechanism using block difficulty and timestamps, and tested contract behavior via Remix IDE.

## PROFESSIONAL EXPERIENCE

### Blockchain Technology Intern — Codec Technologies Pvt. Ltd.

*May 2025 - Jul 2025*

Hybrid, India | AICTE & ICAC Approved Internship Program

- Completed a two-month internship in blockchain technology, gaining practical exposure to decentralized application security, smart contract development, and secure transaction design on Ethereum.
- Collaborated on technical assignments under industry mentorship, strengthening documentation and structured problem-solving in security-relevant contexts.

## EDUCATION

### Bachelor of Engineering (B.E.), Computer Science Engineering

*Graduated Jul 2026*

Specialization: Cybersecurity, IoT & Blockchain Technology

Nawab Shah Alam Khan College of Engineering & Technology, affiliated to Osmania University, Hyderabad | CGPA: 6.6
