PROFESSIONAL SUMMARY

Computer Science Engineering graduate with structured, hands-on training across Windows Server administration, VMware virtualization, and Linux system administration, complemented by foundational knowledge of Microsoft Azure. Lab-based experience includes deploying and managing Active Directory Domain Services, configuring DHCP and file server storage over iSCSI, performing FSMO role transfers, administering VMware virtual machines with vMotion and Storage vMotion, and operating across RHEL7 and RHEL9 environments using YUM and nmcli. Brings an additional layer of value through a cybersecurity and secure-development background, including practical experience with access control and identity management.

TECHNICAL SKILLS

Windows Server Administration: Active Directory Domain Services (AD DC), FSMO Roles, Group Policy (GPO), Organizational Units & User Management, DHCP, File Server & iSCSI Storage, Domain Join Configuration, PowerShell

VMware Virtualization: vCenter Server, ESXi, Virtual Machine Provisioning & Management, vMotion, Storage vMotion

Linux Administration: RHEL7 / RHEL9, YUM Package Management, Network Configuration (nmcli), Command-Line Administration

Cloud (Microsoft Azure): Virtual Machines (Deployment & Resizing), Virtual Networks & VNet Peering, Load Balancer, Network Security Groups (NSG), Azure Firewall, Application Security Groups (ASG), Public IP Addressing, VM Scale Sets, Availability Sets

Networking: TCP/IP Fundamentals, DNS/DHCP, Network Interface Configuration

Additional (Security & Development): Cybersecurity Fundamentals (RBAC, IAM, MFA), Core/Advanced Java, Python, MySQL

PROFESSIONAL EXPERIENCE

Blockchain Technology Intern — Codec Technologies Pvt. Ltd. *May 2025 - Jul 2025*

- Completed a two-month, AICTE & ICAC approved internship in blockchain application development, strengthening documentation, troubleshooting, and structured problem-solving skills applicable across technical environments.

SELF-DIRECTED TECHNICAL TRAINING — WINDOWS SERVER, VMWARE, LINUX & AZURE

Structured Lab-Based Training (Independent, Not Employment) | Apr - Jun 2026

- Deployed and configured Active Directory Domain Controllers (AD DC) — Organizational Units, user/group management, Group Policy (GPO), and FSMO role transfers — plus DHCP, File Server, and iSCSI storage, using PowerShell alongside GUI-based administration.
- Administered virtual machines via vCenter Server and ESXi, with hands-on practice in vMotion and Storage vMotion for live migration and storage management.
- Completed structured Linux administration training across RHEL7 and RHEL9 — YUM package management, network configuration with nmcli, and core command-line administration.
- Built Azure infrastructure labs covering VM deployment/resizing, VNet creation and peering, and a load-balanced two-tier IIS web setup via Azure Load Balancer.
- Studied and compared Azure network security controls — NSG, Azure Firewall, and Application Security Groups — plus VM Scale Sets and Availability Sets for high availability.

SKILLS PRACTICED IN LAB ENVIRONMENT

- Managing Active Directory objects and resolving FSMO role assignments across domain controllers.
- Provisioning and migrating virtual machines using VMware vMotion and Storage vMotion.
- Administering Linux servers (RHEL) and Azure VM/network infrastructure, with attention to security controls (NSG, Firewall).

EDUCATION

Bachelor of Engineering (B.E.), Computer Science Engineering *Graduated Jul 2026*

Nawab Shah Alam Khan College of Engineering & Technology, affiliated to Osmania University, Hyderabad | CGPA: 6.6
